## (Accounting for Not-for-Profit organizations, Partnership firms and Companies)

1. Income and Expenditure Account (I\&E) is similar to the Profit and Loss Account in the sense that while the former is prepared to ascertain surplus or deficit during an accounting period, the latter is prepared to ascertain net profit or net loss incurred during an accounting period. I\&E Account is a nominal account and is prepared on the accrual basis. It records all transactions of revenue nature that are related to the current accounting period (whether outstanding or prepaid) for which the books are maintained. All expenses and losses are recorded on the debit side (Expenditure side) and all income and gains are recorded on the credit side (Income side) of I\&E Account. The closing balance or the balancing figure of I\&E Account is termed as surplus (or deficit), if the sum total of the Income side exceeds (is lesser than) the sum total of the Expenditure side
2. 

a) If partner's loan appears on the assets side of the Balance Sheet then it implies that the partner has taken loan from the business and is liable to pay back to the business. In such case, the loan amount is transferred to his capital account. Thus the accounting entry will be:
Partner's Capital A/c Dr.
To Partner's Loan A/c
(Partner's loan transferred to Partner's Capital Account)
b) If partner's loan appears on the liabilities side of the Balance Sheet then it implies that the partner has forwarded loan to the firm and the firm is liable to pay back the amount to the partner. In such case, partner's loan is paid off after paying all the external liabilities. The partner's loan is not transferred to the Realisation Account, in fact, it is paid in cash. The following accounting entry is passed.-
Partner's Loan A/c
Dr.
To Cash/Bank A/c
(Partner's loan paid in cash)
